

EZ-Screen 600

Compact and Powerful
Portable Screener

Screen soil, sand and compost. The EZ-Screen 600 with double-deck screen box has two aggressively vibrating screens top and bottom.

Shake fines better, cheaper, and greener. The EZ-Screen 600 matches up with a ¾ yard Skid-Steer* with a 84" bucket. Powered by a reliable, gas-miserly 5.5 HP Honda engine, it has a patented non-hydraulic vibratory drive.

Boost profitability. Fewer moving parts make upkeep simple while reducing maintenance concerns and increasing reliability.

SPECIFICATIONS

- Loading bucket size range 1/2 to 3/4 yard (84" or less)
- Feed height at hopper 68"
- Inside access for bucket 100" wide X 48" high
